Power supply unit for led

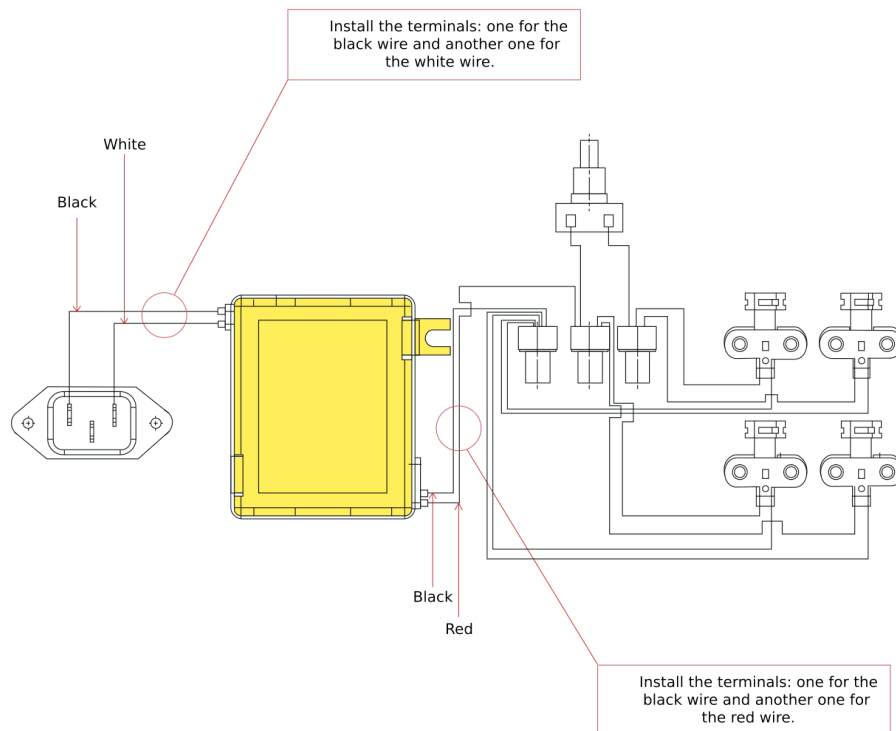

Fig.4

Assemble now the new spare-part:

Strip the wires. Connect the wires primary and secondary of the power unit to the wires of the old power supply unit. Connect them by utilizing terminals (not supplied with the spare-part). Please refer to the electrical connection drawing above.

Collocate the housing (G) back in a way that covers the power supply (J). (fig.3 page 2)

Fasten back the 3 screws (F) (fig.2 page 2)

WARNING! When installing and whenever acting on the appliance, ensure that the power supply has been switched off. For the installation of the spare-part, it is necessary to consult a qualified electrician.
