Bellhop Glass S2

Designed by Edward Barber and Jay Osgerby, 2024

Halogen - 75W

Bellhop Glass Suspension can be used it as an ambient but also as a task light, which directly illuminates, with a non-blinding cone of light, the surface on which it is suspended. The hole in the bottom part of the lamp, protected by an aluminum element, is shaped to direct the light (and change the bulb) avoiding the diffusion up to the eyes of those sitting at the table. A cone of light is therefore created inside the suspended Bellhop Glass, which expands homogeneously in the environment on all sides and lands on the table precisely, like a torch, visually signaled by the colored aluminum ring that surrounds the lower opening of the lamp.
