

FLOS

F001A21A006 Grey

Belvedere Clove 1 Non Dimmable Grey

Designed by Antonio Citterio/assistant Toan Nguyen, 2007

220-240V power supply included. Ready for installation on solid surface. Box for ground installation to be ordered separately. Included 2 way terminal block 4 poles IP68 H2O Stop. Version 110V upon request.

Are you a professional and your project needs consulting and support?

Main specifications

| | |
|------------------------|----------------------|
| EAN | 8054793165554 |
| Mounting | Ground |
| Environments | Outdoor wet location |
| Light source type | LED |
| Light sources included | Yes |
| LED type | Power LED |
| Number of lamps | 1 |
| System power (W) | 8.4 |
| Lumen Output (lm) | 631 |

Physical

| | |
|---------------------|-------|
| Colour | Grey |
| Trim | No |
| Orientation | Fixed |
| Net weight (kg) | 2.07 |
| Package height (mm) | 727 |
| Package width (mm) | 221 |
| Package length (mm) | 185 |
| Package volume (m3) | 0.03 |
| IP internal | 65 |

Ecodesign and Energy Labelling

This product contains a light source of energy efficiency class D

Replaceable (LED only) light source by a professional

Replaceable control gear by a professional

Photometric

| | |
|------------------------|-----------|
| Light distribution | Symmetric |
| CCT (K) | 2700 |
| CRI> | 80 |
| Beam angle C0-180 (°) | 100 |
| Beam angle C90-270 (°) | 100 |

Extreme cut off No

Electrical

| | |
|--------------------|--------------|
| Insulation class | II |
| Frequency (Hz) | 50/60 |
| Main voltage (Vac) | 220-240 |
| Power supply | Integrated |
| Dimmable | No |
| Power supply type | Non Dimmable |
| Dimming interface | Not Dimmable |
| Emergency | No |

Notes

We recommend using a connection system with a degree of protection greater than or equal to the degree of protection of the luminaire.

During the installation and the maintenance of the fixtures it is important to be careful and avoid damages on the paint coating.

Damages on the coating exposed to outdoor conditions or water, could cause corrosion.

Chemical substances affect the anticorrosion covering protection.

For LED fixtures, there is evidence that most of the damages are connected to electrical effects related to the insulations, which cause destructive electrical discharges

These effects are frequently caused by:

- over voltage coming from the mains' network where fixture is connected.
- electrostatic discharge (ESD) coming from the environment.

The use of a protective device against the overvoltage on the electrical installation is warmly suggest this helps to reduce the intensity of some of these phenomenon and prevent irreversible damages. The selection of the type of device to be used must be adjust on the electrical plant.
