## IC Lights T1 High

Designed by Michael Anastassiades, 2014

Halogen - 75W

IC Lights T by renowned designer Michael Anastassiades consists of a thin steel base that twists and bends at an angle. From there, a blown-glass opaline orb delicately balances. The table lamp, which casts diffused light, can be adjusted by a dimmer on the power chord. IC Lights T is now available in a brand-new black finish that adds dimension to the stunning collection of deceptively simple designs. IC Lights T comes in three models in either a brass, chrome, or black finish: - IC Lights T1 High: height 20.8"; base width 12.6" - IC Lights T1 Low: height 15"; base width 6.9" - IC Lights T2: height 13.7"; base width 11" Explore the entire IC Lights family here. Inspiration behind the design: Poise is powerful: That's the message Michael Anastassiades offers with his IC Light Series. From the skillful balance of the sphere and baton that invokes thoughts of a dexterous juggler's act to the lamp's name-IC, a reference to the identity code used to evaluate immigrants entering the UK-the designer makes a commanding statement.
