FLOS

F018D25BU12 Forest Green

In Vitro Suspension Dimmable 1-10V

Designed by Philippe Starck, 2020

Hanging version. Light source included. 110–240V ON/OFF or dimmable electrical power integrated within the dedicated ceiling attachment. Hanging cable length 1000 mm.

Main specifications

EAN	8054793316345
Mounting	Suspension
Environments	Outdoor wet location
Light Source Type	LED
Light sources included	Yes
LED type	Edge Lighting
Number of lamps	1
System power (W)	13
System flux (lm)	799

Physical

Color	Forest Green
Orientation	Fixed
Cord color	Black
Net weight (lb)	10.06
Gross weight (lb)	11.18
Package height (in)	9.25
Package width (in)	25.79
Package length (in)	15.16
Package volume (in)	3616.34
IP internal	66

RG
IEC 62471

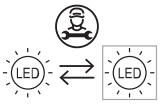
Ecodesign and Energy Labelling

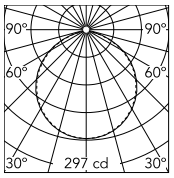
This product contains a light source of energy efficiency class **F**



Replaceable (LED only) light source by a professional

Replaceable control gear by a professional

Schematic light drawing



Luminous flux luminaire
799 lm

Beam Angle: 111°

h(m)	E(lx)	D(m)
1	297	2.89
2	74	5.79
3	33	8.68
4	19	11.57
5	12	14.46

Photometric

Light distribution	Symmetric
CCT (K)	2700
CRI>	80
Beam angle C0-180 (°)	111
Beam angle C90-270 (°)	111
Extreme cut off	No

Electrical

Insulation class	I
Frequency (Hz)	50/60
Main voltage (Vac)	110-240
Driver	Integrated
Dimmable	Yes
Dimming range (%)	1-100
Dimming interface	Dimmer Integrated
Emergency type	No

Notes

We recommend using a connection system with a degree of protection greater than or equal to the degree of protection of the luminaire.
During the installation and the maintenance of the fixtures it is important to be careful and avoid damages on the paint coating.
Damages on the coating exposed to outdoor conditions or water, could cause corrosion.
Chemical substances affect the anticorrosion covering protection.
For LED fixtures, there is evidence that most of the damages are connected to electrical effects related to the insulations, which cause destructive electrical discharges
These effects are frequently caused by:
• over voltage coming from the mains' network where fixture is connected.
• electrostatic discharge (ESD) coming from the environment.
The use of a protective device against the overvoltage on the electrical installation is warmly suggest this helps to reduce the intensity of some of these phenomenon and prevent irreversible damages. The selection of the type of device to be used must be adjust on the electrical plant.
