Caule Floor 3 Nest

Designed by Patricia Urquiola

Caule by Patricia Urquiola is an outdoor collection featuring both in-ground bollards and plug-in floor fixtures with two diffuser options a mesh, nest head and or solid head. Taking after its name, Caule embodies the structure of a flower and its stem. Its natural form blends seamlessly into the environment around, creating intriguing shadows and highlighting outdoor pathways."Caule is an outdoor collection with simple understated lines yet strong style identity. Copying the botanical structure of a flower, the collection features a real flexible slender stem, almost a natural element, a subtle addition to any outdoor setting." - Patricia Urquiola

Notes

We recommend using a connection system with a degree of protection greater than or equal to the degree of protection of the luminaire.

During the installation and the maintenance of the fixtures it is important to be careful and avoid damages on the paint coating.

Damages on the coating exposed to outdoor conditions or water, could cause corrosion.

Chemical substances affect the anticorrosion covering protection.

For LED fixtures, there is evidence that most of the damages are connected to electrical effects related to the insulations, which cause destructive electrical discharges

These effects are frequently caused by:

- over voltage coming from the mains' network where fixture is connected.
- electrostatic discharge (ESD) coming from the environment.

The use of a protective device against the overvoltage on the electrical installation is warmly suggest this helps to reduce the intensity of some of these phenomenon and prevent irreversible damages. The selection of the type of device to be used must be adjust on the electrical plant.
