Notes

Signal repeater:

This product allows to extend the reach or range of the Casambi mesh network.

o Installation is extremely simple: you just have to insert the product in the track and add it to the Casambi network through the App.

Ambient light sensors:

This product allows monitoring of ambient light levels.

o The luminosity data can be used to automatically regulate the brightness of the luminaires that are connected to the Casambi network.

o The sensor has a measurement range between 10 and 1000 lux.

Presence:

This product incorporates a presence sensor capable of detecting the passage of people through its detection area. o The sensor has a detection area of 12 meters in diameter when installed at a height of 3 meters.
